

Customer Story

PANCREATIC CANCER UK

Accounts Payable
Invoice Automation Solution

Customer Background

Pancreatic Cancer UK is a Non-Profit organisation based in London. The organisation's vision is that everyone with pancreatic cancer survives to live long and well.

Pancreatic Cancer UK supports those affected by the disease; lobbying for greater recognition of pancreatic cancer and being a voice for everyone involved in the fight.

The organisation is also investing in ground breaking research, funding world-leading researchers that will transform and save lives.

Customer Situation

Pancreatic Cancer UK faced accounts payable processing challenges brought up by the Covid-19 pandemic as many other businesses. Invoice processing and approval became difficult to manage during lockdown via email.

The decision was taken to look for a solution to help manage invoice processing and approval that was straightforward to implement.

“It was substantially more time consuming constantly trawling through email correspondence, invoices were getting lost, missed and frequently miscoded, generating additional work and email queries for our finance team”

Angela Davis, Director of Finance & Corporate Services

Integration with

The Key Benefits

SAY GOODBYE TO TEDIOUS MANUAL TASKS

The Kefron AP went live in Pancreatic Cancer UK in February 2020. Since then Kefron has automated the processing of around 100 invoices a month on average. The software provides an Accounts Payable Invoice Automation solution which digitises invoices for ease of processing, approval and record keeping.

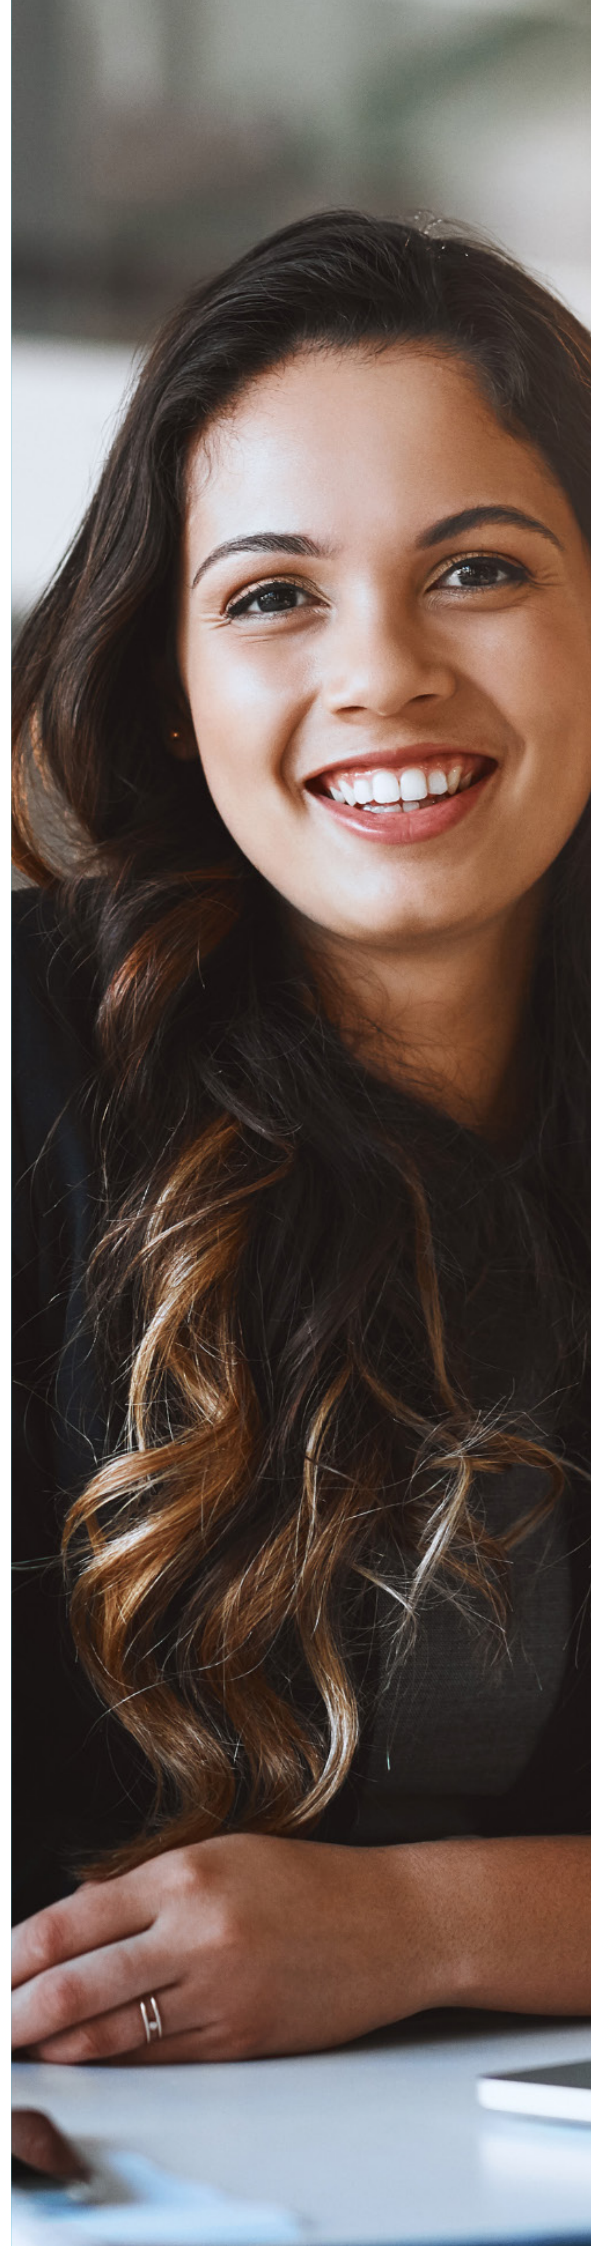

Kefron has automated all the manual processing, freeing up substantial resources to focus on more valuable work.

Invoices can now be sent directly to Kefron AP by suppliers and staff, where they are read by the system, allocated a code and forwarded to the right approver."

Angela Davis, Director of Finance & Corporate Services

The solution eliminated the time consuming manual processes previously applied by the Pancreatic Cancer UK staff and in doing so significantly decreased errors associated with human touchpoints, which translated to no more miscoding or missing invoices.

The System that Digitises any Type of Documents

INCREASED VISIBILITY

Futhermore, Kefron AP has also given Pancreatic Cancer UK the ability to automate not only invoice processing but also easily manage the staff expenses end to end processing.

The automatic upload of staff's expenses documentation freed up their time and increased visibility that provides greater control on the finance function.

The automatic upload of staff's expenses documentation freed up their time and increased visibility that provides greater control on the finance function.

Angela Davis, Director of Finance & Corporate Services

Kefron AP has eliminated low added-value tasks and made the entire operation much more efficient.

Results

“On average, the time it took to process an invoice in 2020 was 63 days, from date of transaction to payment. Since going live with Kefron AP, we are averaging 22 days. So an immediate and significant impact”
