

IT Asset Disposition Services (ITAD)

Smart IT Asset Lifecycle Management
for Maximum Security & ROI

IT Asset Disposition Services

Market-Leading Secure & Sustainable

When your IT equipment reaches the end of its lifecycle, it's crucial to manage its disposal securely, sustainably, and in line with data protection laws.

Our IT asset disposal services ensure that your outdated technology is handled responsibly, with a focus on data security, environmental sustainability, and compliance with all relevant regulations. **We make it simple.**

Responsible IT Disposal & Data Destruction

We safely recycle IT assets and securely shred data-bearing media, combining environmental responsibility with complete information security.

IT Equipment We Can Dispose Of

- Servers/storage systems
- Desktop computers and monitors
- Laptops and tablets
- Smartphones and mobile devices
- Network equipment (routers, switches, firewalls)
- Printers and multifunction devices
- Hard drives and storage components

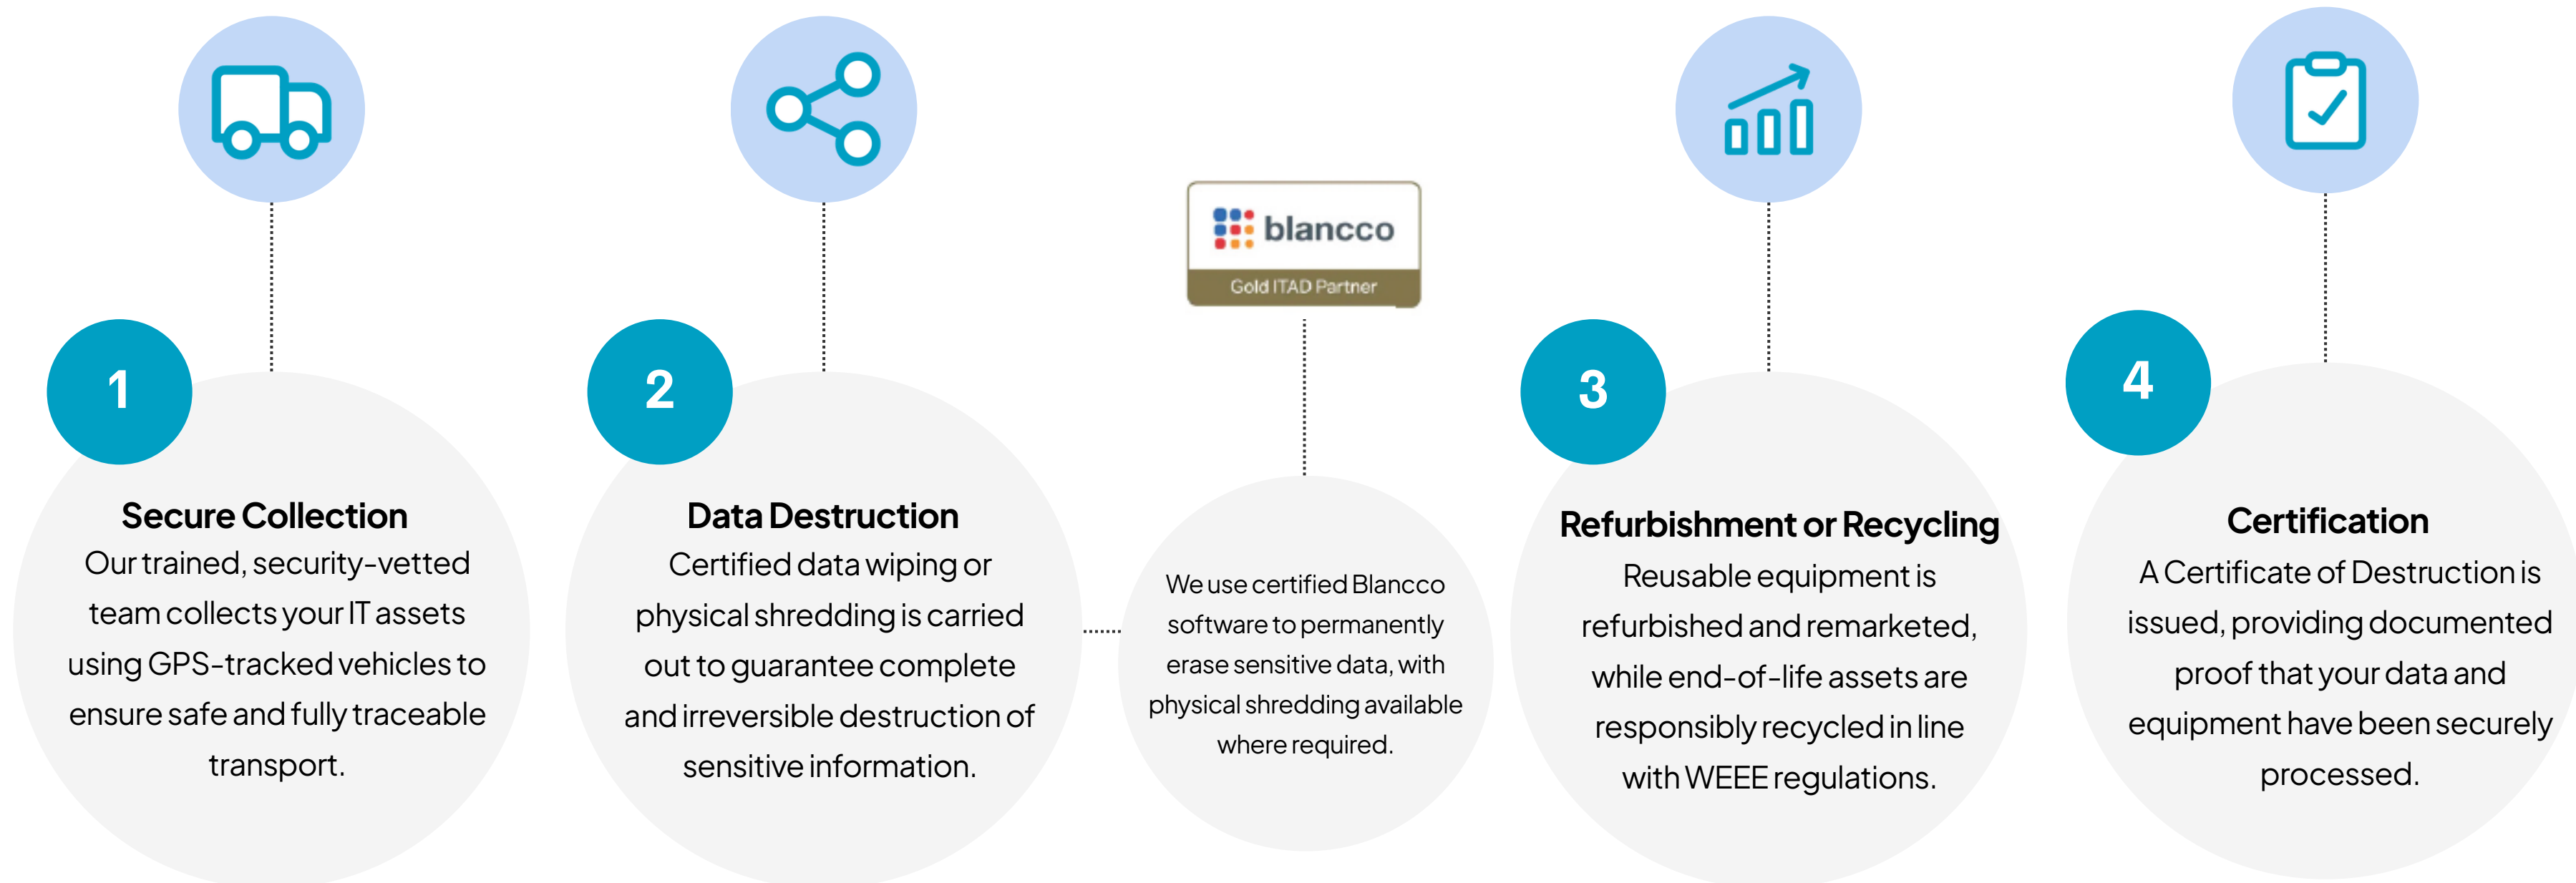

Data-Bearing Media We Can Securely Shred

- Internal and external hard drives
- Mobile phones and PDAs
- Portable storage devices
- Back-up tapes (DAT / DLT)
- CDs, DVDs and floppy disks
- USB sticks and flash media
- CCTV and video tapes
- ID badges, electronic tokens and PIN readers

Our Secure IT Asset Disposal Process

Our trained, security-vetted team collects your IT assets using GPS-tracked vehicles, ensuring safe, fully traceable transport and strict chain-of-custody control from collection through to processing.

The Business Case for Professional ITAD

1

Protect Your Data

Over 80% of data breaches involve compromised devices. Secure erasure and certified destruction prevent sensitive data from being recovered.

2

Support Sustainability

E-waste is one of the fastest-growing waste streams globally. Responsible reuse and recycling reduce environmental impact.

3

Unlock Asset Value

Recover financial value from redundant IT equipment through secure refurbishment and resale.

4

Mitigate Legal Risks

Avoid GDPR penalties of up to €20 million or 4% of annual turnover with compliant data destruction processes.

5

Simplify IT Asset Management

Streamline end-of-life IT processes while improving security, visibility, and operational efficiency.

6

Receive Full Certification

Gain documented proof of destruction with complete audit trails for compliance and reporting.

The Secure Circular Economy

Turning Retired IT Assets into Verifiable Revenue and ESG Gains

Trusted ITAD Delivery

Kefron differentiates itself from competitors by offering a closed-loop ITAD solution that prioritises refurbishment and resale over simple destruction. We don't just dispose of your hardware; we unlock its residual value to fund your next IT refresh, all while providing a "Zero Landfill" guarantee.

Certified Data Destruction

NCSC-certified Blancco data wiping, plus secure on-site and off-site shredding, reducing devices to 20mm or 6mm particles for uncompromised security.

Regulatory Compliance

Four ISO certifications (9001, 14001, 27001, 45001) and Cyber Essentials Plus, ensuring full asset traceability and certified destruction.

Proven Cost Recovery

Decommissioned multiple data centres for a hospitality firm, delivering six-figure savings and generating resale value from high-value servers.

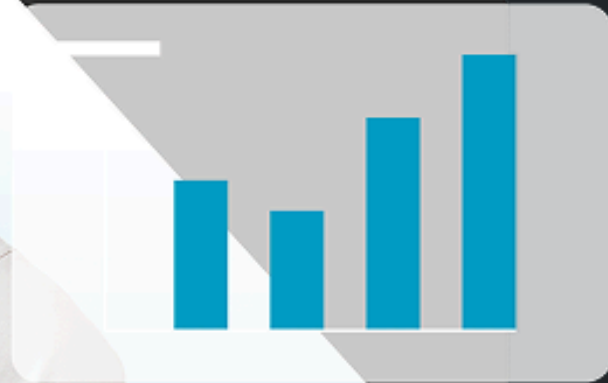

Sustainable Operations

Targeting net zero carbon emissions with a 100% HVO-powered fleet and 100% renewable electricity supply.

Security That You Can Trust

Compliance is central to our ITAD service. We operate to the highest regulatory standards, ensuring secure data handling and full protection from collection through to final destruction.
